OUR PROCESS

1 PRE - PRODUCTION

Pre-production is an early stage of any project. We started with meeting, consulting the objective, finalise the budget, producing moodboard and project timeline.

2 PRODUCTION

Production is the process we start developing raw materials for the post production process. Depends on the project objective. The primary aim is to stick with budget and schedule.

3 POST - PRODUCTION

Post-production is phase when the audio, visual and design materials are cut together to create the end product. An editor assembles footage shot-by-shot, adds music (either original or licensed), and incorporates other sound and visual effects.

4 END PRODUCT

End product is final phase of production process. Customer service will make sure a high quality product will be send in softcopy to the clients before datelines.
